

Scenario:

You are a freshman at the University of South Carolina and you are having trouble saving money. You find yourself going out every weekend but not having enough money to buy groceries or other necessities. You wish your money managing skills were better but it is hard for you to accomplish and keep up with it on your own.

Task 1: Create an account on “Managing Money for College Students”.

Task 2: Browse through the app and fill in information based on your needs with what you need help saving money for.

Task 3: Observe the calculations the app created for you and how much you should budget each week/month. Give the app a 5/5 rating.

Notes:

What changes should be made to the app?

- task 1/download app (is it free and what does it work on)
- give the app a rating based on what you like
- when looking at necessities, make sure to add the amount you spend on the items/what they are
- add more categories on personal spending and the amount spent on each category
- create a calendar section in the app that breaks down the users spending and keeps them on better track for budgeting

What should be kept the same on the app?

- Approved of the option of what year or where you go to school because that influences your atmosphere and where you spend money
- Offering options based on annual or monthly spending
- Liked how you included multiple slots on the necessities
- Liked how you included a spending feature and saving feature so it's not just for saving
- Like how it's target audience is college students
